

The MODULAR FURNITURE SYSTEM is designed in response to student requests that room furniture meet the following criteria:

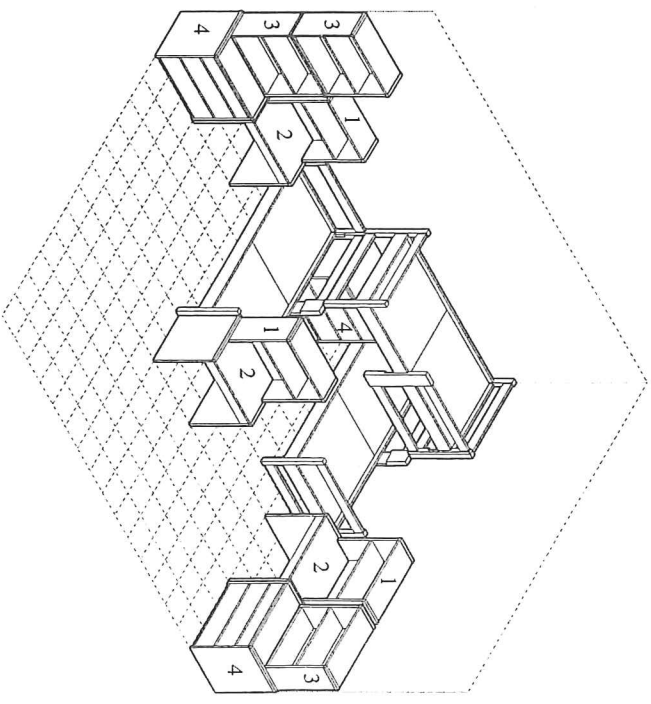

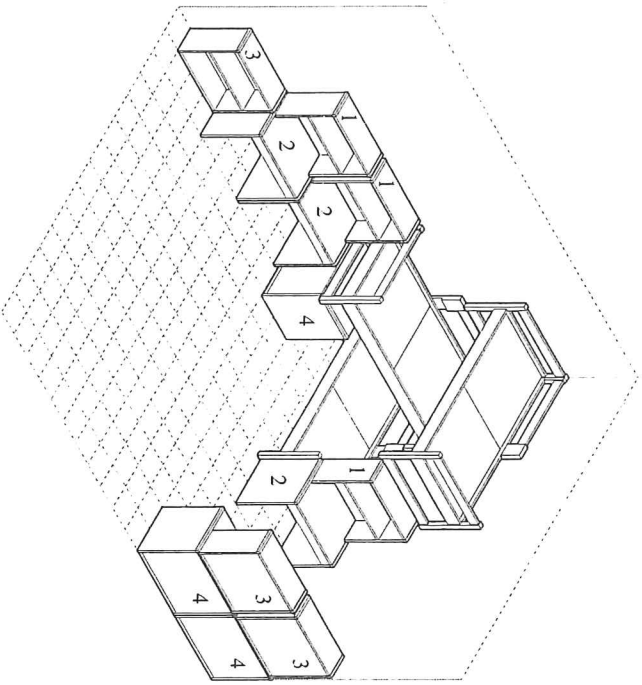

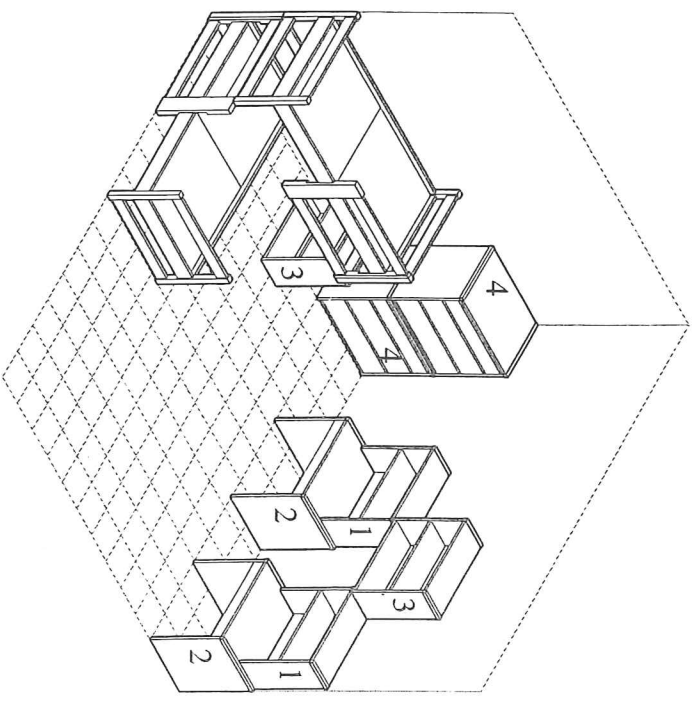

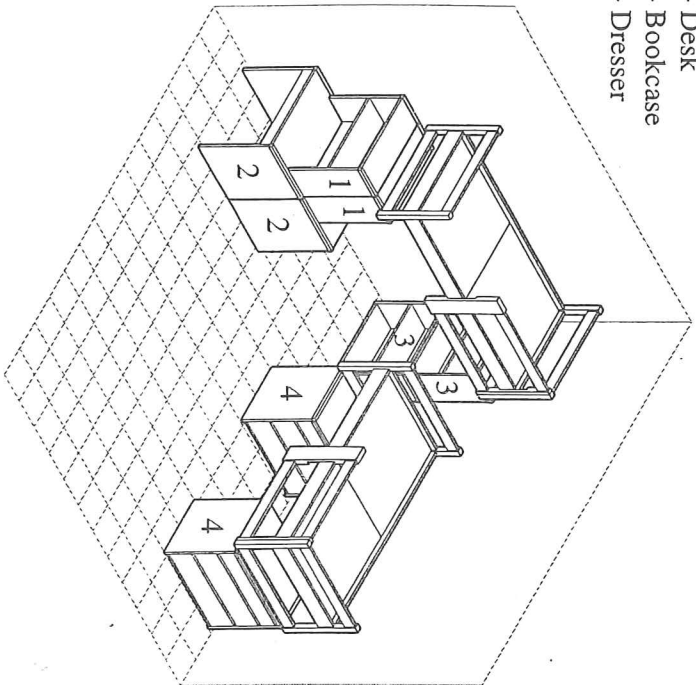

1. Allow multiple arrangements.
2. Provide for easy rearrangement without tools or hardware.
3. Free up room space for sofas, chairs and audio equipment.
4. Provide ample storage with deep and large drawers.
5. Assure safety with solid, stable construction, and built in safety rail.

The following are a few of the many arrangements possible with the MFS:

- 1 - Organizer
- 2 - Desk
- 3 - Bookcase
- 4 - Dresser

- 1 - Organizer
- 2 - Desk
- 3 - Bookcase
- 4 - Dresser

Student Use Information

This "How To" pamphlet offers ideas on how to arrange the components of the MFS. It shows only a few of the possible configurations. The setup you create is limited only by your imagination.

Beds can be positioned at two heights. To change heights, remove mattress and two platform boards and turn bed over.

The MFS is based on a building block concept. The five standard furniture pieces are 30" in height and can be stacked on top of each other in many arrangements. To ensure the furniture is properly positioned in a stacked arrangement a pin and hole system is incorporated into the design of the furniture. Steel pins must be inserted in the holes of a furniture piece before another piece of furniture is stacked on top of it. The long pins should be used when stacking a bed on top of another; the short pins must be used in any other arrangement. No tools are needed to arrange or rearrange the furniture.

Care of your furniture requires a minimum of effort. Most dirt, grease, pen marks, and liquid spills can be removed with liquid dishwashing detergent. The Ultra-violet Cured finish is much harder than conventional finishes, giving superior resistance to a wide variety of common liquids that stain or damage other finishes.

You have the finest and most versatile furniture system made for the college market. The arrangement possibilities are virtually unlimited. We hope you will enjoy arranging and using the MFS.
